Journal of Fermentation and Bioengineering

VOLUME 79 · 1995

THE SOCIETY FOR FERMENTATION AND BIOENGINEERING, JAPAN

JOURNAL OF FERMENTATION AND BIOENGINEERING

Chairman: Tohru KODAMA

International Editors: Itaru URABE (Editor in Chief, Japan), Bo MATTIASSON (Sweden, Europe), Peter L. ROGERS (Australia, Oceania), Henry Y. WANG (USA, America)

Editorial Board:

John P. BARFORD (Australia)
Amaret BHUMIRATANA (Thailand)
Ho Nam CHANG (South Korea)
Howard CHASE (UK)
Cha Yong CHOI (South Korea)
Charles L. COONEY (USA)
Kenji FURUKAWA (Japan)
Katsuya GOMI (Japan)
Olle HOLST (Sweden)
Hiroyuki HONDA (Japan)
Wei-Shou HU (USA)
Shih-Yow HUANG (R. O. China)
Shinji IIJIMA (Japan)
Mahendra K. JAIN (USA)
Michimasa KISHIMOTO (Japan)
Yourong LI (P. R. China)
I. S. MADDOX (New Zealand)
Tohru NAGASAWA (Japan)
Tadaatsu NAKAHARA (Japan)
Takuya NIHIRA (Japan)
Hisao OHTAKE (Japan)
Tetsuo OKA (Japan)
POH Chit Laa (Singapore)
Dewey RYU (USA)
Rolf D. SCHMID (Germany)
Kazuyuki SHIMIZU (Japan)
Sakayu SHIMIZU (Japan)
Atsuhiko SHINMYO (Japan)
Kenji SONOMOTO (Japan)
Masahiro TAKAGI (Japan)

Journal of Fermentation and Bioengineering

CONTENTS
VOLUME 79 • 1995

ORIGINALS

Development of an Integrative DNA Transformation System for the Yeast *Hansenula anomala*. Tomoo Ogata, Yasushi Okumura, Yuzuru Iimura, and Takaji Obata 1- 5

Isolation and Characterization of *Zygosaccharomyces rouxii* Mutants Defective in Proton Pumpout Activity and Salt Tolerance. Shigetoshi Yoshikawa, Ken-ichi Chikara, Hajime Hashimoto, Nobuo Mitsui, Makoto Shimosaka, and Mitsuo Okazaki 6- 10

Reconstruction of Ethanol Fermentation in Permeabilized Cells of the Yeast *Saccharomyces cerevisiae*. Kazuhiko Takeshige and Kozo Ouchi 11- 16

Purification and Some Properties of *Aspergillus pulverulentus* β-Xylosidase with Transxylosylation Capacity. Joko Sulistyo, Yoshi Kamiyama, and Tsuneo Yasui 17- 22

High-Level Production of Recombinant Glutamic Acid-Specific Protease from *Bacilllus licheniformis* in *Bacillus subtilis* Expression System. Koichi Matsumoto, Kenji Mitsushima, Mikio Tamaki, Hideo Iwamoto, Shinji Kakudo, Hiroyuki Okamoto, Hiroshige Tsuzuki and Hiroshi Teraoka 23- 27

Microbial Asymmetric Reduction of (*RS*)-2-(4-Methoxyphenyl)-1,5-benzothiazepin-3,4(2*H*,5*H*)-dione, the Key Intermediate in the Synthesis of Diltiazem Hydrochloride. Hiroaki Matsumae, Hiroshi Douno, Shinichi Yamada, Takuo Nishida, Yasuhiko Ozaki, Takeji Shibatani, and Tetsuya Tosa 28- 32

Regioselective Bioconversion of Colchicine and Thiocolchicine into Their Corresponding 3-Demethyl Derivatives. Alexander Poulev, Ezio Bombardelli, Cesare Ponzone, and Meinhart H. Zenk 33- 38

Characterization of New Denitrifying *Rhodobacter* Strains Isolated from Photosynthetic Sludge for Wastewater Treatment. Akira Hiraishi, Keigo Muramatsu, and Katsuro Urata 39- 44

Modeling of the Sensory Evaluation of Sake by Dempster-Shafer's Measure and Genetic Algorithm. Kazuo Matsuura, Masato Hirotsune, Masaaki Hamachi, and Yataro Nunokawa 45- 53

Use of Chemostat Data for Modelling Extracellular-Inulinase Production by *Kluyveromyces marxianus* in a High-Cell-Density Fed-batch Process. Marco C. M. Hensing, Johannes S. Vrouwenvelder, Chris Hellinga, Johannes P. van Dijken, and Jack T. Pronk 54- 58

Gene Cloning and Characterization of Thermostable Peptidyl Prolyl *cis-trans* Isomerase (PPIase) from *Bacillus stearothermophilus* SIC1. Dong-Ju Kim, Masaaki Morikawa, Masahiro Takagi, and Tadayuki Imanaka 87- 94

Development of a Stable Shuttle Vector and a Conjugative Transfer System for *Gluconobacter oxydans*. Masako Shinjoh and Tatsuo Hoshino 95- 99

Trichloroethylene Degradation by Genetically Engineered Bacteria Carrying Cloned Phenol Catabolic Genes. Masanori Fujita, Michihiko Ike, Jun-ichi Hioki, Koji Kataoka, and Masahiro Takeo 100-106

Experimental Sketch of Landscapes in Protein Sequence Space. Savitr

3 161HI XL 1250 2/96 31249-150

Trakulnaleamsai, Tetsuya Yomo, Masako Yoshikawa, Satoshi Aihara, and Itaru Urabe 107–118

Identification of Cholesterol Oxidase from Fast-Growing Mycobacterial, Strains and *Rhodococcus* sp. Danuta Wilmańska, Jarosław Dziadek, Anna Sajduda, Krystyna Milczarek, Adam Jaworski, and Yoshikatsu Murooka ... 119–124

Purification and Characterization of a Protease-Resistant Cellulase from *Aspergillus niger*. Shunichi Akiba, Yoshiharu Kimura, Kenji Yamamoto, and Hidehiko Kumagai 125–130

Cell-Free System Derived from Heat-Shocked *Escherichia coli*: Synthesis of Enzyme Protein Possessing Higher Specific Activity. Norihiro Nishimura, Yoshihisa Kitaoka, and Mitsuru Niwano 131–135

Toxic Effects of Hg^{2+} to a Hg^{2+}-Resistant *Pseudomonas* in the Presence of Halide Ions. Ma. Lourdes B. Buelva, Kazuo Kakii, and Mitsuo Kuriyama 136–140

Biotransformation of Cyclic β-Keto Esters by *Chlorella pyrenoidosa* Chick. Fumiki Yoshizako, Masayo Ogino, Atsuo Nishimura, Mitsuo Chubachi, and Toyokazu Horii 141–145

Sophorolipids Production by *Candida bombicola* Using Self-Cycling Fermentation. William C. McCaffrey and David G. Cooper 146–151

Effect of Cell Movement by Random Mixing between the Surface and Bottom of Photobioreactors on Algal Productivity. James C. Ogbonna, Hirokazu Yada, and Hideo Tanaka 152–157

Continuous Culture Study of Transient Behaviour of *Saccharomyces cerevisiae* Growing on Sucrose and Fructose. John P. Barford, Joanna H. Johnston, and Patrick K. Mwesigye 158–162

Observation of Microorganism Colonies Using a Scanning-Laser-Beam pH-Sensing Microscope. Motoi Nakao, Shinji Inoue, Ryu Oishi, Tatsuo Yoshinobu, and Hiroshi Iwasaki 163–166

Pseudo-Steady State Oxygen-Concentration Profiles in an Agar Slab Containing Growing *Nitrobacter agilis*. René H. Wijffels, Meinard R. Eekhof, Dirk de Beer, Johannes C. van den Heuvel, and Johannes Tramper 167–170

Characterization *In Vitro* of the Hydroxylase Component of Xylene Monooxygenase, the First Enzyme of the TOL-Plasmid-Encoded Pathway for the Mineralization of Toluene and Xylenes. Jeffrey P. Shaw and Shigeaki Harayama 195–199

Isolation and Characterization of Pz-Peptidase from *Bacillus licheniformis* N22. Somsit Asdornnithee, Eiichi Himeji, Kouichi Akiyama, Takeshi Sasaki, and Renkichi Takata 200–204

Overexpression and *In Vitro* Reconstitution of the Ethylene-Forming Enzyme from *Pseudomonas syringae*. Katsuya Ishihara, Masayoshi Matsuoka, Yorinao Inoue, Sumio Tanase, Takahira Ogawa, and Hideo Fukuda 205–211

Purification and Properties of Cellobiose Phosphorylase from *Clostridium thermocellum*. Keijitsu Tanaka, Takashi Kawaguchi, Yukio Imada, Toshihiko Ooi, and Motoo Arai 212–216

Purification, Characterization and Structure Analysis of NADPH-Dependent D-Xylose Reductases from *Candida tropicalis*. Shin-ichiro Yokoyama, Tohru Suzuki, Keiichi Kawai, Hiroyuki Horitsu, and Kazuhiro Takamizawa 217–223

Kinetics and Mechanism of Acyl Transfer by Penicillin G Acylase Comparing Acyl Donors Methyl Chloroacetate and Methyl Phenylacetate. Kouji Isaka, Naoko Suga, and Fumihiro Ishimura 224–228

Daunomycin Biosynthesis by Microbial Conversion of Precursor Metabolites Using Biosynthetically Blocked Mutants. Akihiro Yoshimoto, Tomohiko

Nakamura, Katsuro Kubo, Osamu Johdo, and Hiroshi Tone 229–235
Maximum Yield of Foreign Lipase in *Escherichia coli* HB101 Limited by Duration of Protein Expression. Dae Hyun Hahm, Soo Hyoung Kim, Jaegu Pan, and Joon Shick Rhee 236–241
Production of Fructosylxylosides by *Scopulariopsis brevicaulis* sp. Hiroyuki Takeda and Shinichi Kinoshita 242–246
Non-Fragmenting Variants of *Streptomyces* Hyphae Have Enhanced Activity of an Enzyme (Phospho-*N*-Acetylmuramyl Pentapeptide Translocase) in Peptidoglycan Biosynthesis. Karen M. Pickup and Michael E. Bushell ... 247–251
Growth of Submerged Mycelia of *Aspergillus kawachii* in Solid-State Culture. Shigetoshi Sudo, Seiji Kobayashi, Akihiro Kaneko, Kazuo Sato, and Toshiteru Oba 252–256
Light Emitting Diode-Based Algal Photobioreactor with External Gas Exchange. Choul-Gyun Lee and Bernhard Ø. Palsson 257–263
On-Line Monitoring and Control of Acetone-Butanol Fermentation by Membrane-Sensor Mass Spectrometry. Somchai Chauvatcharin, Tatsuji Seki, Kazuhito Fujiyama, and Toshiomi Yoshida 264–269
Improved Performance of a Hybrid Design Over an Anaerobic Filter for the Treatment of Dairy Industry Wastewater at Laboratory Scale. Pedro R. Córdoba, Alejandro P. Francese, and Faustino Siñeriz 270–272
Comparative Composition and Characteristics of Methanogenic Granular Sludges Treating Industrial Wastes under Different Conditions. Zafar Iqbal Bhatti, Kenji Furukawa, and Masanori Fujita 273–280
Enhanced Production of Peroxidase in Continuous Culture of *Arthromyces ramosus* by Selective Bleeding of Mycelium. Pei-Xin Yao, Nobuya Matsumoto, Hideo Tsujimura, Masamitsu Takaya, and Kiyoshi Toda 307–312
Transphosphatidylation Reaction of Phosphatidylcholine to 4-Methoxyphenol in Water-Immiscible Organic Solvents with Immobilized Phospholipase D. Masaaki Takami and Yukio Suzuki 313–316
Continuous Production of L-Aspartic Acid from Ammonium Fumarate Using Immobilized Cells by Capture on the Surface of Nonwoven Cloth Coated with a Pyridinium-Type Polymer. Nariyoshi Kawabata, Hidetaka Hatanaka, and Hidetoshi Odaka 317–322
Conversion of D-Psicose to Allitol by *Enterobacter agglomerans* Strain 221e. Syed Muniruzzaman, Hisahiro Tokunaga, and Ken Izumori 323–327
Biosynthesis of Poly(3-Hydroxybutyrate-co-3-Hydroxyvalerate) by Newly Isolated *Agrobacterium* sp. SH-1 and GW-014 from Structurally Unrelated Single Carbon Substrates. Eun Yeol Lee, Sang Hyeon Kang, and Cha Yong Choi 328–334
Optimal Disruption Methods for the Selective Recovery of β-Galactosidase from *Escherichia coli*. Ryoichi Kuboi, Hiroshi Umakoshi, Naoyuki Takagi, and Isao Komasawa 335–341
Strategy for Inducing Pertinent Cell Line and Optimization of the Medium for *Stizolobium hassjoo* Producing L-DOPA. Shih-Yow Huang, Shi-Ying Chen, Kuo-Long Wu, and Wei-Tai Taung 342–347
Characteristics of Granular Methanogenic Sludge Grown on Phenol Synthetic Medium and Methanogenic Fermentation of Phenolic Wastewater in a UASB Reactor. Yong-Jin Chang, Naomichi Nishio, and Shiro Nagai 348–353
High Rate Performance and Characterization of Granular Methanogenic Sludges in Upflow Anaerobic Sludge Blanket Reactors Fed with Various Defined Substrates. Satoshi Fukuzaki, Naomichi Nishio, and Shiro Nagai 354–359

Expression of Recombinant Antibody against Cancer-Specific Carbohydrate. Kuniaki Takagi, Kiyoshi Yasukawa, Yoshitaka Iba, Yuji Isobe, Yasunobu Suketa, Reiji Kannagi, Katsunori Kohda, Masahiro Takagi, and Tadayuki Imanaka 405–409

Genetic Modification of the *Streptomyces* Cholesterol Oxidase Gene for Expression in *Escherichia coli* and Development of Promoter-Probe Vectors for Use in Enteric Bacteria. Nobuhiko Nomura, Kwang-Pil Choi, Mitsuo Yamashita, Hiroko Yamamoto, and Yoshikatsu Murooka 410–416

Extracellular Production of Phospholipase D of *Streptomyces antibioticus* Using Recombinant *Escherichia coli*. Yugo Iwasaki, Naoto Mishima, Kousaku Mizumoto, Hideo Nakano, and Tsuneo Yamane 417–421

Cloning of the *xynNB* Gene Encoding Xylanase B from *Aspergillus niger* and Its Expression in *Aspergillus kawachii*. Kotaro Kinoshita, Makoto Takano, Takuya Koseki, Kiyoshi Ito, and Kimio Iwano 422–428

Identification of Malting Barley Varieties by Genome Analysis. Youichi Tsuchiya, Shigeki Araki, Hirohisa Sahara, Masachika Takashio, and Shohei Koshino 429–432

Thermostable Alkaline Lipase from a Newly Isolated Thermophilic *Bacillus*, Strain A30-1 (ATCC 53841). Yongxiang Wang, Kailash C. Srivastava, Gwo-Jenn Shen, and Henry Y. Wang 433–438

***R*-(−)-Mandelic Acid Production from Racemic Mandelic Acids by *Pseudomonas polycolor* with Asymmetric Degrading Activity.** Eiji Takahashi, Katsuhiko Nakamichi, Masakatsu Furui, and Takao Mori 439–442

Comparison of Neomycin Production from *Streptomyces fradiae* Cultivation Using Soybean Oil as the Sole Carbon Source in an Air-Lift Bioreactor and a Stirred-Tank Reactor. Noriyasu Ohta, Yong Soo Park, Kazutoyo Yahiro, and Mitsuyasu Okabe 443–448

Factors Affecting the Ethanol Productivity of Yeast in Molasses. Kazuhiko Takeshige and Kozo Ouchi 449–452

Promotive Effect of 5-Aminolevulinic Acid on the Growth and Photosynthesis of *Spirulina platensis*. Ken Sasaki, Facundo J. Marquez, Naomichi Nishio, and Shiro Nagai 453–457

Production of Plantlets for Use as Artificial Seeds from Horseradish Hairy Roots Fragmented in a Blender. Yutaka Nakashimada, Nobuyuki Uozumi, and Takeshi Kobayashi 458–464

A Mass Spectrometry Membrane Probe and Practical Problems Associated with Its Application in Fermentation Processes. Somchai Chauvatcharin, Konstantin B. Konstantinov, Kazuhito Fujiyama, Tatsuji Seki, and Toshiomi Yoshida 465–472

Effect of Water Activity on Enzyme Hydration and Enzyme Reaction Rate in Organic Solvents. Sun Bok Lee and Ki-Joo Kim 473–478

Enzyme Reaction Kinetics in Organic Solvents: A Theoretical Kinetic Model and Comparison with Experimental Observations. Sun Bok Lee 479–484

Polymerase Chain Reaction Amplification and Restriction Fragment Length Polymorphism Analysis of 16S rRNA Genes from Methanogens. Akira Hiraishi, Yoichi Kamagata, and Kazunori Nakamura 523–529

Expression of a *celE* Gene from *Clostridium thermocellum* in *Bacillus*. Rustem I. Aminov, Nikolai P. Golovchenko, and Kunio Ohmiya 530–537

Direct Uptake of Alginate Molecules through a Pit on the Bacterial Cell Surface: A Novel Mechanism for the Uptake of Macromolecules. Tomohiro Hisano, Yoshimasa Yonemoto, Tetsuo Yamashita, Yasuki Fukuda, Akira Kimura,

and Kousaku Murata 538–544

Immunoadsorption of Impurities Contained in Recombinant Human Serum Albumin Secreted from Yeast. Shigeo Katoh and Kazuya Watanabe 545–548

Production and Characteristics of Some New β-Agarases from a Marine Bacterium, *Vibrio* sp. Strain JT0107. Yasushi Sugano, Hideki Nagae, Koji Inagaki, Takeshi Yamamoto, Ichiro Terada, and Yoshinari Yamazaki 549–554

Control of Intracellular Ammonium Level Using Specific Oxygen Uptake Rate for Overproduction of Citric Acid by *Aspergillus niger*. Kong Sik Kim, Young Je Yoo, and Min Hong Kim 555–559

Breeding of High Glycerol-Producing *Shochu* Yeast (*Saccharomyces cerevisiae*) with Acquired Salt Tolerance. Toshiro Omori, Kiyoshi Ogawa, and Masahiko Shimoda 560–565

Influence of the Concentrations of D-Xylose and Yeast Extract on Ethanol Production by *Pachysolen tannophilus*. Vicente Bravo, Fernando Camacho, Sebastián Sánchez, and Eulogio Castro 566–571

Effects of Agitator Configuration and Rotational Speed on the Production of Extracellular Polysaccharide by *Xanthomonas cucurbitae* PCSIR B-52. Shahjahan Baig and Hafiz Sameer Ahmad 572–578

Enhancement of tPA Production under Hyperoxic Conditions by BHK Cells in Serum-Free and Serum-Containing Cultures. Jin Wang, Hiroyuki Honda, Hideki Watanabe, and Takeshi Kobayashi 579–584

Efficient Production of Celery Embryos and Plantlets Released in Culture of Immobilized Gel Beads. Ken-ichiro Suehara, Katsuhito Kohketsu, Nobuyuki Uozumi, and Takeshi Kobayashi 585–588

Effective Lactic Acid Production by Two-Stage Extractive Fermentation. Hiroyuki Honda, Yoshio Toyama, Hiroshi Takahashi, Takuo Nakazeko, and Takeshi Kobayashi 589–593

Extractive Fermentation of Gibberellic Acid by *Gibberella fujikuroi*. Dirk Hollmann, Jörn Switalski, Sven Geipel, and Ulfert Onken 594–600

Characteristics of a Newly Isolated Fungus, *Geotrichum candidum* Dec 1, Which Decolorizes Various Dyes. Seong Jun Kim, Kenichi Ishikawa, Mitsuyo Hirai, and Makoto Shoda 601–607

Trichloroethylene Degradation by Cells of a Methane-Utilizing Bacterium, *Methylocystis* sp. M, Immobilized in Calcium Alginate. Hiroo Uchiyama, Kazuhito Oguri, Mari Nishibayashi, Etsuo Kokufuta, and Osami Yagi 608–613

NOTES

***In Vivo* Recombination of Two R68.45-Primes, One Carrying Plasmid Genes for Autotrophy (Aut) from *Alcaligenes hydrogenophilus* and the Other Carrying a σ^{54}-Like Chromosome Gene from *Pseudomonas oxalaticus*.** Fusako Umeda, Tomoko Seko, Kazuhiro Yano, Noritsugu Goda, Kiyohito Yagi, Yoshiharu Miura, and Tadashi Mizoguchi 59– 61

Determination of the Transcriptional Initiation Sites of the Kanamycin Resistance Genes of pUB110 and pTHN1. Takayuki Hoshino, Shima Eda, Yukihiko Fukase, and Masanao Oda 62– 63

Effects of Elevated Expression of the *CYP51* ($P450_{14DM}$) Gene on the Sterol Contents of *Saccharomyces cerevisiae*. Hitoshi Tainaka, Hideaki Hashimoto, Yuri Aoyama, and Yuzo Yoshida 64– 66

Purification and Properties of a Citrate Synthase from *Nitrosomonas* sp. TK794 and a Comparison with the Enzymes of Another Nitrifying Bacteria.

Tomohide Asai, Reiji Takahashi, Tomoko Fujioka, and Tatsuaki Tokuyama 67- 69

Enzymatic Production of D-Glutamate from L-Glutamate by a Glutamate Racemase. Makoto Yagasaki, Masaki Azuma, Shuichi Ishino, and Akio Ozaki 70- 72

Participation of Reactive Oxygens in the Formation of a Purple Pigment, Hordeumin, from Barley Bran-Fermented Broth. Riichiro Ohba, Ichiro Nakayama, Ikuo Suda, and Seinosuke Ueda 73- 75

Efficient Release of Thermostable β-Galactosidase by Glycine Addition and Thermal Treatment of *Escherichia coli* Cells. Osamu Ariga, Takao Yoshinaga, and Yoshiki Sano 76- 78

Repression of Mycelia Extension from a Support Carrier Containing Immobilized Growing *Aspergillus oryzae*. Yasuhiko Imai, Katsunori Ishikawa, Roberto D. Ayo, Masaru Suzuki, Masatoshi Matsumura, and Hiroshi Kataoka 79- 82

A Facile Preparation of Enantiomers of Ethyl 4,4,4-Trifluoro-3-(Indole-3-) Butyrate, a Novel Plant Growth Regulator. Katsuya Kato, Masato Katayama, Rakesh K. Gautam, Shozo Fujii, Haruhiko Fukaya, and Hiroshi Kimoto 171-173

Properties of Zinc Uroporphyrin III Produced from Isopropanol by *Arthrobacter hyalinus*. Masahiro Kajiwara, Shinji Tokiwa, Kazuhiko Takatori, and Ichiro Kojima 174-176

Stimulatory Effects of Amino Acids and Oleic Acid on Poly(3-Hydroxybutyric Acid) Synthesis by Recombinant *Escherichia coli*. Sang Yup Lee, Yoo Kyung Lee, and Ho Nam Chang 177-180

L-Serine Synthesis Using the Resting *Hyphomicrobium* sp. NCIB10099 Cells under Suppressive Conditions for L-Serine-Degrading Activity. Toyokazu Yoshida, Tairo Hagishita, Toshio Mitsunaga, and Yoshikazu Izumi 181-183

Preparation of D-Sorbose from D-Tagatose by Immobilized D-Tagatose 3-Epimerase. Hiromichi Itoh, Tomoko Sato, Tomohiro Takeuchi, Anisur Rahman Khan, and Ken Izumori 184-185

Comparative Studies on Utilization of Fatty Acids and Hydrocarbons in *Nocardia amarae* and *Rhodococcus* spp. Keisuke Iwahori, Min Wang, Hironori Taki, and Masanori Fujita 186-189

Some Factors Which Affect the Phosphorus Uptake of a Phosphorus-Accumulating Bacterium, Strain NM-1. Mamoru Kawaharasaki and Kazunori Nakamura 190-192

Enhancement of Transgene Expression in Mammalian Cell Line by a Δ^7-Prostaglandin A_1 Analogue. Taichi Matsuda, Toshiyuki Takai, Masaki Hikida, Tatsuji Yasuda, Seizi Kurozumi, and Hitoshi Ohmori 281-283

Comparison of Liposome Immune Lysis Assay (LILA) and Enzyme-Linked Immunosorbent Assay (ELISA) for Detection of Antibodies. Kanji Tomioka, Hideki Fukuda, and Shigeo Katoh 284-286

A Selective Isolation Method for *Actinomadura viridis* in Soil. Masayuki Hayakawa, Yuka Momose, Takayuki Kajiura, Toyohiko Yamazaki, Tomohiko Tamura, Kazunori Hatano, and Hideo Nonomura 287-289

Growth of Moderately Thermophilic Iron-Oxidizing Bacterium Strain TI-1 in Synthetic Medium. Tsuyoshi Sugio, Kimiko Kishimoto, Masaki Takai, Keiichi Oda, and Tatsuo Tano 290-293

Ethanol Fermentation Promoted by Delignified Cellulosic Material. Lazaros Iconomou, Costas Psarianos, and Athanasios Koutinas 294-296

Hybrid Simulation of Microbial Behavior Combining a Statistical Procedure and

Fuzzy Identification of Culture Phases. Jun-ichi Horiuchi, Michimasa Kishimoto, and Haruo Momose 297–299
Thermochemical Liquidization and Anaerobic Treatment of Dewatered Sewage Sludge. Shigeki Sawayama, Seiichi Inoue, Tatsuo Yagishita, Tomoko Ogi, and Shin-ya Yokoyama 300–302
Host Range Specificity of a Novel Runaway-Type Vector for Mammalian Cells. Hideyo Kirinaka, Masamichi Kamihira, and Shinji Iijima 360–362
Secretive Expression of the *Aspergillus aculeatus* Cellulase (FI-CMCase) by *Saccharomyces cerevisiae.* Kazuhisa Minamiguchi, Toshihiko Ooi, Takashi Kawaguchi, Hirosuke Okada, Sawao Murao, and Motoo Arai 363–366
Purification, Crystallization, and Characterization of the Extracellular Invertase from *Zymomonas mobilis.* Hideshi Yanase, Mayumi Iwata, Keiko Kita, Nobuo Kato, and Kenzo Tonomura 367–369
Purification and Properties of Mycodextranase from *Bacillus circulans* NHB-1. Katsuichiro Okazaki, Sheng Yong Jin, Yutaka Sawamura, and Shigeru Hayakawa 370–372
Diffusional and Electrostatic Effects on Apparent Kinetic Parameters of Reactions Catalyzed by Enzyme Immobilized on the External Surface of a Support. Fumihide Shiraishi 373–377
Characteristics of a Biopolymer Flocculant Produced by *Bacillus* sp. PY-90. Haruhiko Yokoi, Osamu Natsuda, Jun Hirose, Sachio Hayashi, and Yoshiyuki Takasaki 378–380
DO-Stat Fed-Batch Production of *cis,cis*-Muconic Acid from Benzoic Acid by *Pseudomonas putida* BM014. Sang-Gu Bang and Cha Yong Choi 381–383
Production of C_2-Symmetrical Phenazines by Some Actinomycetes. Ikunosuke Tanabe, Masayuki Kuriyama, and Hideo Nonomura 384–386
Substrate Permeability in Pellets Formed by *Aspergillus niger.* Keisuke Iwahori, Sigeru Tatsuta, Masanori Fujita, and Koichiro Yamakawa 387–390
Effect of Dissolved Oxygen and pH on Moranoline (1-Deoxynojirimycin) Fermentation by *Streptomyces lavendulae.* Masahiko Kojima, Noriyuki Tachikake, Yohsuke Kyotani, Kiyotaka Konno, Shigeaki Maruo, Masashi Yamamoto, and Tohji Ezure 391–394
Biological Production of Hydrogen from Cellulose by Natural Anaerobic Microflora. Yoshiyuki Ueno, Tatsushi Kawai, Susumu Sato, Seiji Otsuka, and Masayoshi Morimoto 395–397
Biomethanation of Cheese Whey Using Anaerobic Upflow Fixed Film Reactor. Priti Patel, Manik Desai, and Datta Madamwar 398–399
Inference of Methanogenic Bacteria in Wastewater Digestor Sludges by Lipid Component Analysis. Masateru Nishihara, Masayo Akagawa-Matsushita, Yoshitaka Togo, and Yosuke Koga 400–402
Molecular Cloning and Sequencing of the Phenol Hydroxylase Gene from *Pseudomonas putida* BH. Masahiro Takeo, Yoshimichi Maeda, Hiroshi Okada, Kanako Miyama, Kazuhiro Mori, Michihiko Ike, and Masanori Fujita 485–488
Production of Recombinant Cytochrome *c*-551 in a *Pseudomonas aeruginosa* Mutant Strain. Hiroyuki Arai, Yan Zhang, Yoshihiro Sambongi, Yasuo Igarashi, and Tohru Kodama 489–492
Production of Ubiquinone in *Escherichia coli* by Expression of Various Genes Responsible for Ubiquinone Biosynthesis. Xufen Zhu, Mihoko Yuasa, Kazunori Okada, Kengo Suzuki, Tsuyoshi Nakagawa, Makoto Kawamukai, and Hideyuki Matsuda 493–495
Purification and Characterization of a Ribitol Dehydrogenase from *Enterobacter*

agglomerans **Strain 221e.** Syed Muniruzzaman, Yasutaka Kunihisa, Kenji Ichiraku, and Ken Izumori 496–498

Thermostable Succinyl-Coenzyme A Synthetase from *Nitrosomonas europaea* ATCC 25978: Purification and Properties. Hiroshi Kondo, Takashi Ohmori, Haruka Shibata, Keiko Sase, Reiji Takahashi, and Tatsuaki Tokuyama 499–502

Anaerobic Degradation of 3-Hydroxypropanoate by a Newly Isolated *Clostridium* sp. Kazuhiro Tanaka 503–505

Breeding of *Aspergillus terreus* Mutant TN-484 for Itaconic Acid Production with High Yield. Kazutoyo Yahiro, Tetsushi Takahama, Yong Soo Park, and Mitsuyasu Okabe 506–508

Mycelial Propagation and Enzyme Production in *Koji* Prepared with *Aspergillus oryzae* on Various Rice Extrudates and Steamed Rice. Cheng-Chun Chou and Jin-Hwei Rwan 509–512

Effects of Yeast Invertase on Ethanol Production in Molasses. Kazuhiko Takeshige and Kozo Ouchi 513–515

Production of Monascus Pigments by a Solid-Liquid State Culture Method. Yuan-Kun Lee, Duan-Cheng Chen, Somchai Chauvatcharin, Tatsuji Seki, and Toshiomi Yoshida 516–518

Diauxie in Immobilized Microorganisms. Osamu Ariga, Masatoshi Saito, and Yoshiki Sano 519–521

Mutants of D-Aminopeptidase with Increased Thermal Stability. Yasuhisa Asano and Kaori Yamaguchi 614–616

5-Azacytidine Enhances Transient Expression of a Transfected Gene in Cultured Mammalian Cells. Toshiyuki Takai, Tatsuji Yasuda, and Hitoshi Ohmori 617–619

Production of L-Tagatose from Galactitol by *Klebsiella pneumoniae* Strain 40b. Tsuyoshi Shimonishi, Yasuhito Okumura, and Ken Izumori 620–622

TECHNICAL NOTES

Preparation of Artificial Seeds Using Cell Aggregates from Horseradish Hairy Roots Encapsulated in Alginate Gel with Paraffin Coat. Vez Pagara Repunte, Masahito Taya, and Setsuji Tone 83– 86

Enhancement of Mutation Frequency with Nucleotide Triphosphate Analogs in PCR Random Mutagenesis. Hiroshi Ueda, Masaki Nakanishi, Eiji Suzuki, and Teruyuki Nagamune 303–305
